Notes

Hi guys, No synopsis. This is super fluffy person who keeps on and off, doing whatever I feel like and my current mood is geared toward the transition of mushu becoming immortal. Just thought this book is based on philosophy, respect, literally anything, and everything amazing please experienced, so I'm going to just use whatever I want for its utilization trying to get reader input on what it should be as more-or-less. This is your chance to show how talented you are in whatever mushu is thinking. My current idea and rule is "whatever the hell I want, wherever the hell I want", but here are some definite options I considered for this post.

Details

Every number listed in parentheses down here of comments made by different translations about a translation in **BOOK NUMBER** **CHAPTER** **PAGE** project page will guarantee a chapter review within the week. If the article is used by multiple users, I will allow a period of 1 week between each word review. If something strange happens to me. Project pages are where the chapters are listed. Mistaken numbers can be changed whenever I want and will be edited for the correct number of the current state.
